Education

CMR College of Engineering and Technology, Medchal 2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 8.08/10

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, Object-Oriented Programming

Technical Skills

Languages: JavaScript, TypeScript, Java, C/C++, SQL

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, Redis, BullMQ

Frontend: React, Vite, Tailwind CSS

Tools & Testing: Git/GitHub, Vitest, Docker, Postman, REST APIs

AI/Automation: LLM APIs & prompt engineering (self-taught; first hands-on project in progress); learning browser automation (Playwright)

Projects

PingAlert

[GitHub](#)

Node.js, Express, PostgreSQL, Redis, BullMQ, Nodemailer, Vitest

- Built PingAlert end to end: a monitoring pipeline (Node.js, Redis, BullMQ) that runs scheduled checks and triggers an automated email-alerting workflow (Nodemailer) when a monitored endpoint goes down.
- Debugged and fixed issues in code and infrastructure I didn't originally design correctly for – a double database-connection release and a duplicate-alert race condition that only surfaced under concurrent load.
- Found and closed a TOCTOU DNS-rebinding SSRF vulnerability in an external-request flow, adding a DNS-resolution guard and redirect-destruction logic to handle malicious/unexpected inputs safely.
- Hardened `/api/health` to run live PostgreSQL and Redis checks instead of returning static status, and load-tested the pipeline with autocannon to find real throughput limits under load.

BookMySpot

[Live Demo](#)

Node.js, Express, MongoDB

- Built an event-booking system with concurrency-safe reservation logic to prevent overbooking, designing the MongoDB schemas and REST APIs for browsing, booking, and managing events.

Organization Income & Expense Tracker

[Live Demo](#)

Node.js, Express.js, MongoDB

- Built a MongoDB-backed expense-tracking system with role-based approval so submitted expenses are reviewed and approved before being finalized.

Achievements

- Solved 300+ problems on [LeetCode](#); ranked in the top 9.02% with a contest rating of 1767.

Certifications

- **Udemy Certified Web Developer** – Udemy, Issued Apr 2026 (Credential ID: UC-f6bc82b1-417a-4bd8-b72f-de63d1444a52)
